

TTB Label Verifier

Select a UI workflow.

Upload Verification UI

Upload one label image and one application-data text file to run direct verification.

Open Upload Verification

Test Runner UI

Run the configured test suite cases and inspect expected versus extracted results.

Open Test Runner

Test Runner

Run configured test cases to compare application data against OCR-extracted label text and validation checks.

Run Test Cases

Progress: 6/6

Passed: 5 | Failed: 1

Case Results

Checks format: field: status (score) [method]. Score is confidence (0-100); method is the matching strategy used.

Case	Status	Comparison		Checks	Missing Items Advice	Mismatches
EXACT FULL CHECKS	PASS	Application Data	Extracted Data	brand_name: pass (100) [normalized_phrase] abv: pass (100) [percent] class_type: pass (100) [normalized_phrase] net_contents: pass (100) [regex_detected]	Gov Warning Producer Address (Origin)	-
EXACT BRAND / ABV MATCH	PASS	Application Data	Extracted Data	brand_name: pass (100) [normalized_phrase] abv: pass (100) [percent] class_type: fail (39) [fuzzy] net_contents: pass (100) [regex_detected]	Gov Warning Producer Address (Origin)	-
FUZZY BRAND / ABV MATCH	FAIL	Application Data	Extracted Data	brand_name: fail (73) [fuzzy] abv: pass (100) [proof] class_type: fail (32) [fuzzy] net_contents: pass (100) [regex_detected]	Gov Warning Producer Address (Origin)	brand_name expected 'warning' but got 'fail'
FAIL BRAND	PASS	Application Data	Extracted Data	brand_name: fail (51) [fuzzy] abv: pass (100) [percent] class_type: fail (38) [fuzzy]	Gov Warning Producer Address (Origin)	-
